

TYPE LBI-2000

Eliminate over 50% of bearing failures with our bearing isolator: a true non-contacting labyrinth design with a shut-off that really works.

Characteristics

- ▶ Verification Tested contacting & non-contacting bearing seal designs
- ▶ Proven to increase equipment reliability in pumps, electric motors, fans, pillow blocks, steam turbines and gearboxes
- ▶ No shaft wear. Retro fittable on shafts previously worn by lip seals
- ▶ Easily rebuildable with no special tools, chemicals or equipment
